

Ebihen 16

Traditional motor boat

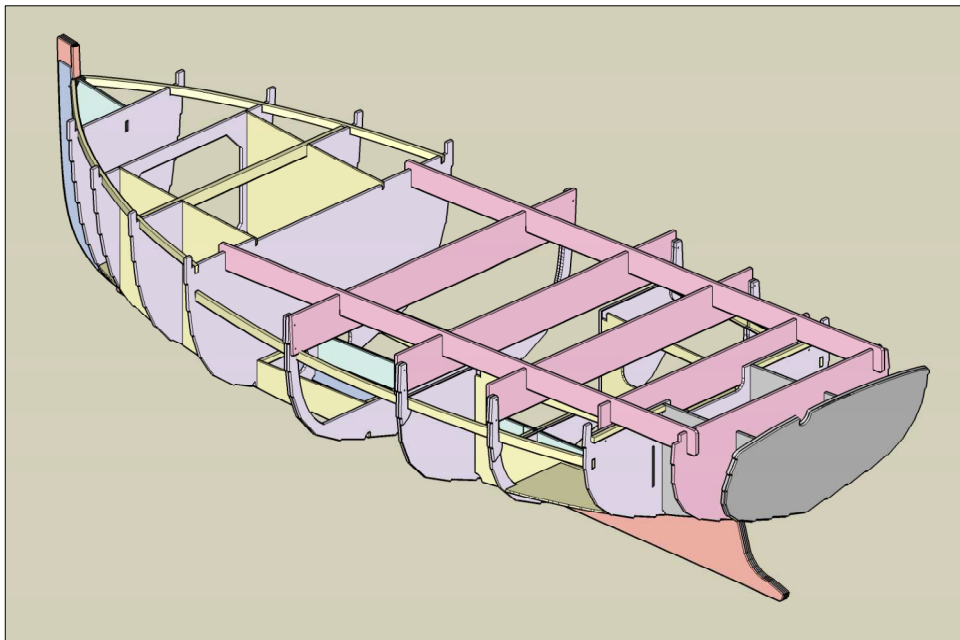

Ebihen 16 is a seaworthy, stable boat with good carrying capacity. It is suitable for family sailing, as well as fishing.

She is fitted with an outboard motor in a well. Handle is at helmsman reach. The rudder, just aft of propeller, makes steering as easy as with a diesel engine.

Ebihen can be built and stored during winter time in a common garage. It is of course trailerable.

The clinker version is mainly made of plywood, for planking but also backbone and transverse bulkheads, then much more easy to build by a first time amateur.

Hull length	4.80 m
Waterline length	4.40 m
Breadth	1.85 m
Draught	0.43 m
Weight (without motor)	400 kg
Motor	4 to 10 hp
CE category	C
Crew	5
